

Hi Brandon,

Oddly enough, I was just raving to my colleague about how INCREDIBLE your session was. The interactive component was not only FUN, but the EXACT kind of experience I would want to gain out of a workshop.

Within my 5 years of attending conferences and higher education workshops, this was the absolute BEST! Thank you for using your creativity and skill to challenge our thought processes. It was amazing to see the tools you used in order to spark conversation and thought related to professional, racial, and economic differences and the importance of those differences.

I would support and recommend you to keep on pushing 1,000 percent! (My only note was that I wish I was able to walk away with a hand out or take away. There were so many awesome things that were discussed regarding peoples thoughts/comments that I wish I had the opportunity to write it down and have notes about it)

Thank you again for your amazing coordination, work, and passion! Feel free to use any of the above as part of a review!

Have a great summer!
